TABLE A-6

Response rates for science, engineering, and health organizational units: 1975-2020

(Number and percent)

| | | Total response | | Complete response | | Partial response | | Nonresponse | |
|------|--------|----------------|---------|-------------------|---------|------------------|---------|-------------|---------|
| Year | Total | Number | Percent | Number | Percent | Number | Percent | Number | Percent |
| 2020 | 21,156 | 20,486 | 96.8 | 17,764 | 84.0 | 2,722 | 12.9 | 670 | 3.2 |

NA = not available; organizational units providing partial responses are included in complete response column prior to 1981 and reported separately beginning in 1981.

Note(s):

Percentages may not add to total because of rounding.

Source(s):

National Center for Science and Engineering Statistics, Survey of Graduate Students and Postdoctorates in Science and Engineering.

^a The 1976 survey also collected 1975 data from master's-granting institutions.

^b Master's-granting institutions were not surveyed in 1978; totals represent estimates based on 1977 and 1979 data.

^c Calculated using response-rate formula used through 2003. See appendix A, "Technical Notes."

^d Calculated using response-rate formula used from 2004 to 2006. Schools closed in 2005 because of Hurricane Katrina were counted as nonrespondents.

e Calculated using response-rate formula implemented in 2007. See appendix A, "Technical Notes."

^f The 2010 and 2011 postdoctoral appointees (postdocs) and doctorate-holding nonfaculty researcher data were reimputed following the 2012 data collection; these numbers have been updated to reflect the reimputed data and supersede those contained in previous reports.

⁹ In 2014, the survey frame was updated following a comprehensive frame evaluation study. The study identified potentially eligible but not previously surveyed academic institutions in the United States with master's- or doctorate-granting programs in science, engineering, or health. A total of 151 newly eligible institutions were added, and two private for-profit institutions offering mostly practitioner-based graduate degrees were determined to be ineligible.

h In 2017, the data collection methods changed, substantially increasing the number of added units. In addition, several previously eligible fields became ineligible.
